

SKILLED NURSING FACILITY

The ONLY Hospital-based Skilled Nursing Facility in Fort Bend County

Skilled nursing care facilities are licensed healthcare facilities that are inspected and regulated by the state's Department of Health Services. OakBend's Skilled Nursing Facility (SNF) offers a place for those who need *short-term* rehabilitation following a hospital stay or long-term nursing supervision because of health issues or disabilities. We are equipped to care for individuals needing 24-hour nursing care, post-operative recuperation, or complex medical care demands, as well as chronically ill individuals who

can no longer live independently. All patients are under the care of physicians, who visit regularly and are responsible for each patient's overall plan of care. Our goal is to engage each patient to restore their highest level of functioning and independence as quickly as possible. The personal care offered by our friendly staff includes the services of bathing, dressing, eating, walking, incontinence, and maneuvering in and out of bed.

What to Expect:

- Social and educational activities
- On-site critical care nursing
- End-of-life or hospice care
- Cath Lab access
- 24-hour emergency physician coverage
- Pharmaceutical, laboratory, and radiology services
- Key higher level of care services available 24 hours a day
- Semi-private room accommodations (private rooms upon availability)
